

PRESS RELEASE

City of East Point: 100 Projects. 9 Years. 1 Dedicated Partner.

Atlanta, Georgia, June 30, 2006 -- At **Prime Engineering**, our motto is: "We use our clients' definition of success as our measurement of performance." So we're proud that the **City of East Point** recently selected us as its engineering partner for the 100th time. Prime has teamed with this rapidly growing city for nearly a decade, providing design, engineering, permitting, and construction services on projects ranging from bridges to streets to sewers. In the process, the relationship between Prime and East Point has strengthened to the point that City officials trust Prime staff as an extension of their own department. We are honored to have reached this milestone, and we look forward to Project #200.

About Prime Engineering, Inc.

Prime Engineering, Inc. is an employee-owned, full-service consulting firm based in Atlanta, Georgia.
