Prime Engineering Awarded ZipPak Facility Contract

Atlanta, Georgia, July 13, 2007 -- Prime Engineering, Inc. has been awarded a contract to provide engineering, surveying, landscape architecture, and construction administration services for AKRA Building Solutions' proposed ZipPak facility on Lithonia Industrial Boulevard. The facility, a 91,350-square-foot building, will support administrative, manufacturing, and shipping functions for ZipPak's operations.

Scott Schmidt, Vice President of Business Development for Prime Engineering, said, "Prime has been a leader in the Atlanta civil engineering market for 17 years. Over time, Prime's facilities and architectural business has boomed to the point that we have recently created an entire department to focus exclusively on this type of work. Contract awards such as the ZipPak facility are testament to the high-quality work we provide in this arena. We look forward to working with AKRA Building Solutions on this project and continuing to expand this exciting segment of our operations."
