

PRESS RELEASE

Jim Graves Leads Facilities Department

Atlanta, Georgia, November 21, 2006 -- **Prime Engineering, Inc.** is pleased to announce that James W. (Jim) Graves, AIA, NCARB, LEED AP has accepted the position of Manager for Prime's newly launched Facilities Department. Formerly a Senior Vice President at highly respected Atlanta architectural firm Turner Associates, Mr. Graves has built a distinguished 32-year career designing and developing public- and private-sector facilities across a broad range of industries. Projects Mr. Graves has designed and overseen include airports, water and wastewater treatment facilities, transit facilities, prisons, schools and universities, housing developments, industrial facilities, courthouses, office buildings, and parking decks. Additionally, as a certified **Leadership in Energy and Environmental Design (LEED)** AP, Mr. Graves has expertise in designing facilities that meet the architectural profession's highest standards for performance and sustainability.
