

CLIENT 2005 - CITY OF EAST POINT

100 PROJECTS. 9 YEARS. 1 DEDICATED PARTNER.

At Prime, our motto is: "We use our clients' definition of success as our measurement of performance." So we're proud that the City of East Point recently selected us as its engineering partner for the 100th time. Prime has teamed with this rapidly growing city for nearly a decade, providing design, engineering, permitting, and construction services on projects ranging from bridges to streets to sewers. In the process, the relationship between Prime and East Point has strengthened to the point that City officials trust Prime staff as an extension of their own department. We are honored to have reached this milestone, and we look forward to Project #200.

AWARD WINNING

AWARD WINNING

- 97-2005-001 Ben Hill Road Widening
- 97-2005-002 Building Evaluations
- 97-2005-003 Waste Transfer Facility Review
- 97-2005-004 Stormwater RFP Preparation
- 97-2005-005 East Point Noise Study
- 97-2005-006 Utilization Study
- 97-2005-007 Underground Storage Tank Compliance Review
- 98-2005-008 East Point - Surveying
- 98-2005-009 Beaver Run Pistol Range Improvements

- 06-2005-100 3413 Sir Henry Street Culvert Replacement

"The enthusiasm exhibited by Mr. Gambino and his staff throughout the process was contagious. They kept the vision of the completed bridge clear in City officials' minds when the bridge was nothing more than a set of pilings - and assisted the City in building public awareness over the project. ...Prime assisted the City in securing additional project funding sources. Prime staff's commitment to the project throughout every phase was evident."

Erica Rocker, Main Street Coordinator - Economic Development
City of East Point, Georgia

"I have found that Prime's final construction documents are complete and of notably good quality and cost estimates are conservative yet realistic.... We have come to depend on the insights and knowledge of your staff regarding permitting issues... hands-on involvement with every step of the permitting process has pushed through projects that typically get caught up in permitting tie-ups."

Derek Bogan, Director of Public Works
City of East Point, Georgia
