

JOSEPH E. BOONE BOULEVARD REDEVELOPMENT, WATERLINE DESIGN, AND SIDEWALK DESIGN

ATLANTA, GA

Prime is designing a road dieting plan for a 1.25-mile boulevard, including sidewalk design, water quality enhancements, bicycle lane additions, and streetscape improvements.

Boone Boulevard runs through a transformational neighborhood just northwest of the new Atlanta Falcons dome. The City wants to revive the neighborhood and is investing in new road and park improvements in the area. To ensure maximum funding, it is essential that the project be completed within 360 calendar days of Notice to Proceed.

Prime Engineering is providing surveying and civil design services for this fast-track design-build project. Due to Prime's extensive experience in designing roads, water quality enhancements, streetscapes improvements, and permitting experience in the City of Atlanta, the aggressive schedule is currently being met.

Project Elements:

- Roadway and sidewalk design
- Utility location (SUE)
- Field surveying
- Right-of-way and property line resolution
- Conceptual design
- Construction documents
- Hydrologic/hydrology design
- Water quality design
- Bicycle path design
- Storm drainage design
- Erosion and sediment control design
- Permitting
- Construction staking
- Construction administration/inspection
