

## GOLDEN STATE FOODS – EMPLOYEE WELFARE AREA AND OFFICE EXPANSION

CONYERS, GA

Prime Engineering is designing a two-story, 24,000-square-foot addition to a food processing plant to include new entrances, offices, employee locker rooms and break room.

This addition will provide space for a next-phase Product Development Laboratory and increase the sanitary standards of the facility.

### ***Project Elements:***

- Assessment of existing site conditions
- Land surveying
- Subsurface geotechnical testing
- Relocation of existing site utilities
- Regrading of adjacent paving
- Modification of existing site
- Architectural design
- Civil engineering
- Structural engineering
- Specifications
- Bid phase administration
- Construction administration
